

# FABULOUS FOLIAGE

## DOUBLE BLOODROOT

*SANGUINARIA CANADENSIS MULTIPLEX*

### FOLIAGE

Beautiful blue-green kidney shaped fan foliage that remains tidy for months and eventually goes dormant in late summer.

### FLOWERS

Pure white flowers, in early spring.

### HARDINESS ZONES

4 to 5

### LIGHT REQUIREMENTS

Partial sun/light shade to shade; a hidden gem in your light shade perennial bed.

### SIZE

Plant grows to a height of 5-6 inches (12-15 cm); clump will slowly spread over a number of years; can be dug up and transplanted; this plant does not set seed.

### WATER / SOIL REQUIREMENT

Moist well-drained soil.

### PESTS

Diseases that infect bloodroot include *Alternaria* leaf blight, *Botrytis* (gray mold, leaf blight), and root rot (*Pythium*), **BUT** bloodroot is generally pest free.
