

FABULOUS FOLIAGE

SIBERIAN BUGLOSS

BRUNNERA MACROPHYLLA – JACK FROST CULTIVAR

CULTIVARS

Other cultivars have slightly different coloration in the foliage, with slightly different veining – Silver Heart, Sea Heart, Alexander's Great, Looking Glass.

FOLIAGE

Attractive heart-shaped, silver leaves edged and veined with dark green. Basal leaves form a foliage mound which remains attractive throughout the growing season. Foliage may scorch in hot summer sun.

FLOWERS

Small, blue, forget-me-not-like flowers with white centers that bloom in airy, branched racemes rising well above the foliage on slender stems to 18 inches (45 cm) tall in spring.

HARDINESS ZONE

4 to 5

LIGHT REQUIREMENTS

Partial sun / light shade to shade; foliage brightens up a shady area.

SIZE

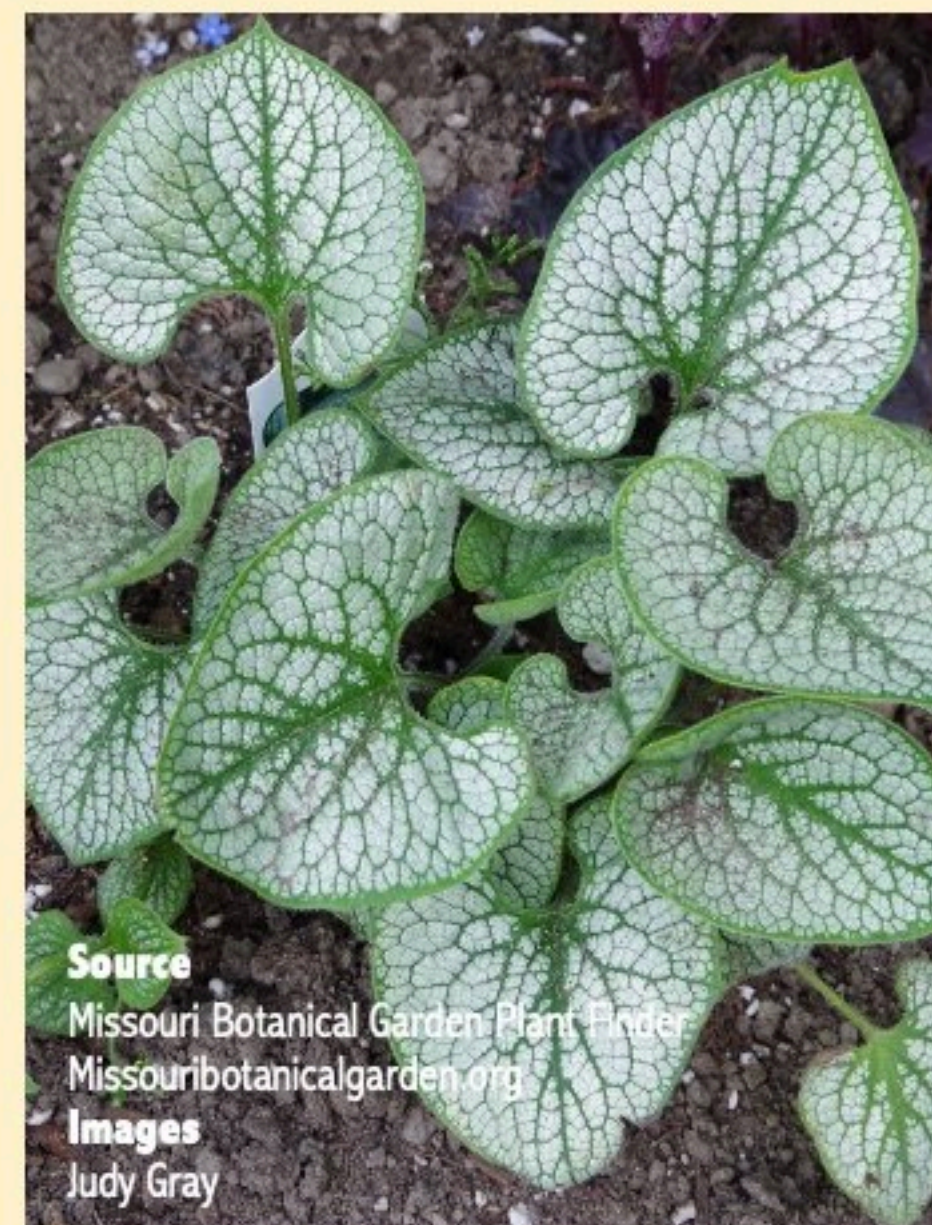

Height: 12-18 in. (30-45 cm); Width: 18-30 in. (45-75 cm). Clumps slowly spread by creeping rhizomes to form thick ground covers. Plants may self-seed in optimum growing conditions.

WATER / SOIL REQUIREMENT

Easily grown in average, medium moisture, well-drained soil. Prefers moist, organically rich soils in shady areas. Generally intolerant of dry soils, but tolerates some dryness better than most other cultivars of this species.

PESTS

No serious insect or pest problems.
