

At a Glance: 25 Plants That Deer Won't Touch

While there are many plants out there that claim to be 'deer resistant', there are a few standbys that are pretty much guaranteed to make the deer in your neighborhood scrunch their noses up in disgust and walk right over to your neighbor's! When gardening with deer, it is easy to get discouraged and think of all the beautiful plants that you can't grow. However, there are also many great plants that they won't touch, and with a bit of planning and imagination you too can have a beautiful deer proof yard. As a basic guideline, deer are repelled by prickles, odd textures and strong scents. And as a bonus, many deer proof plants are also drought tolerant and good for pollinators. This list is not exhaustive, but here are 25 of our favorite deer proof plants that are easy to find at local garden centres.

<u>Common Name</u>	<u>Latin Name</u>	<u>Features</u>	<u>Link to Photo</u>
Barberry	<i>Berberis</i>	Shrub of various sizes, often prickly. Beautiful fall colour.	https://www.rhs.org.uk/plants/357469/berberis-thunbergii-orange-sunrise-pbr-(v)/details
